THEME OF THE SEMINAR:

The feminist approach often focuses on analyzing gender inequality. Themes often explored in feminist theory and also requires holding accountable powerful actors such as duty-bearers and responsibility-holders for their human rights obligations and responsibilities to rebalance the distribution of power and achieve just and inclusive societies. The feminist approach values diversity and inclusion as essential assets for achieving transformative change and sustainable development and responds to lived experiences by taking into account intersectional dimensions of discrimination and inequality. Such an approach creates space for advocacy and dialogue, builds alliances in pursuit of common objectives and meets international human rights obligations. Feminism is a complex and multifaceted movement that has evolved over time to encompass a broad range of themes and theories. From its historical roots in the fight for women’s suffrage to its contemporary expressions focused on intersectionality, reproductive rights, violence against women, gender identity, and more, feminism has sought to address gender inequality in all its forms. The theories of feminism, including liberal feminism, socialist feminism, radical feminism, postmodern feminism, black feminism, and trans-feminism, offer different perspectives on how to achieve gender equality, but all share the common goal of promoting equal rights and opportunities for individuals of all genders. As we continue to strive for a more just and equitable world, feminist theory and activism will undoubtedly play a critical role in shaping the future of gender relations.
